pygeoapiconfiguration in QGIS

Taller

The ultimate goal of this workshop is to let anyone publish geospatial data using OGC API; that is done, by facilitating the configuration of pygeoapi with a user friendly UI.

Objetivos

- Install the pygeoapi configurator plugin in QGIS.
- Read a pygeoapi configuration file through the plugin UI.
- Modify various configuration options of pygeoapi, including adding, editing and removing OGC API collections.
- Save the changes on the configuration file, obtaining a YAML that can be deployed in a pygeoapi server.
